

ESG Platforms: What components make a (great) platform?

Cloud-based

Simplify collaboration, sharing, and reporting processes

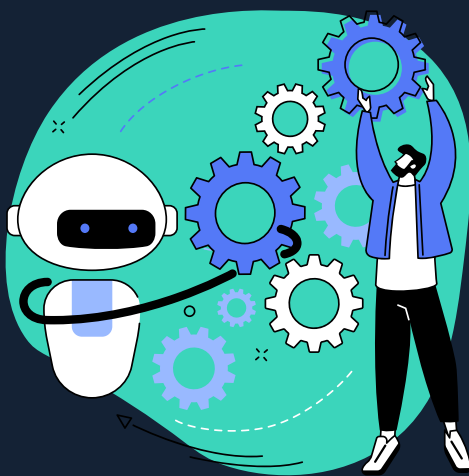

Comprehensive

Enable strategy development, workflow management & data collection for multiple requirements

Automated

Automate and streamline data collection through the use of an API

Auditable

Ability to support any audit by providing data trails, history reports, and exports

Scalable

Ability to grow with an organization and accommodate various ESG requirements

Secure

Comply with industry best practices for security requirements and certification.
